

CURRICULUM VITAE – MATTHEW J. JANOUSEK

Senior Geotechnical Engineer

Current Address

COTTON, SHIRES AND ASSOCIATES, INC.
2804 Camino Dos Rios, Suite 201
Thousand Oaks, California 91302
Phone: (805) 375-1050, FAX: (805) 375-1059
Email: mjanousekd@cottonshires.com

Registration

Registered Geotechnical Engineer in California, GE 3005
Registered Civil Engineer in California, CE 73401

Education

MS, Geotechnical Engineering, University of California, Los Angeles, California, 2005
BS, Civil Engineering, Colorado State University, 2003

Representative Experience

Mr. Janousek is a registered California Professional and Geotechnical Engineer with 10 years experience in geotechnical studies, including: field exploration, laboratory testing, engineering analyses and reporting, plan review, and construction observation. He has managed geotechnical studies for bridges, hillside water tanks on landslides, pipelines, and levees. He has also coordinated field work for residential, commercial, and public buildings; medical, corrections facilities, airports, roads, and bridges; and military, power, and recreational facilities. He has observed the installation of hundreds of driven and drilled piles (CIDH), ground anchors, and has experience with hollow-stem-auger, rotary wash, and bucket augers drilling. His technical background includes evaluation of seepage, slope stability, settlement, shallow and deep foundation design, compressible and expansive soils, and liquefaction potential. Mr. Janousek also has several years' experience on construction sites, from observation of grading and compaction activities to installation of building and bridge foundations.

Mr. Janousek's project management experience includes: tracking budget and schedule; directing, monitoring, and controlling technical work; preparing technical reports, bid packages, and cost estimates; providing leadership to the team throughout the project; and ensuring delivery of high-quality products. As project engineer, he works closely with the project team to analyze data, prepare reports, facilitate workshops, and train field staff for geotechnical observation and testing.

Professional History

Senior Geotechnical Engineer, Cotton, Shires and Associates, May 2015 to Present
Project Engineer, Fugro Consultants, Inc., Ventura, CA, November 2008 to February 2015
Staff Engineer, Kleinfelder, Diamond Bar, CA, July 2005 to November 2008

Professional Affiliations

American Society of Civil Engineers
Society of American Military Engineers
