

CURRICULUM VITAE – MATTHEW J. JANOUSEK

Supervising Geotechnical Engineer

Current Address

COTTON, SHIRES AND ASSOCIATES, INC.
699 Hampshire Road, Suite 101
Thousand Oaks, California 91361
Phone: (805) 370-8710
Email: mjanousek@cottonshires.com

Registration

Registered Geotechnical Engineer in California, GE 3005
Registered Professional Civil Engineer in California, PE 73401

Education

M.B.A. Candidate, California State University, Northridge, expected 2020
Graduate Certificate in Business Administration, California State University, Northridge, 2018
M.S., Geotechnical Engineering, University of California, Los Angeles, California, 2005
BS, Civil Engineering, Colorado State University, Fort Collins, 2003

Representative Experience

Mr. Janousek is a registered California Professional and Geotechnical Engineer with over 15 years' experience in geotechnical studies, including: field exploration, laboratory testing, engineering analyses and reporting, plan review, and construction observation. He has managed geotechnical studies for bridges, retaining walls, roadways, levees, pipelines, and hillside water tanks on landslides. He has also coordinated field exploration for roads, bridges, public facilities, commercial, residential, medical, airports, and recreational facilities. His technical background includes evaluation of retaining walls, pavements, seepage, slope stability, settlement, shallow and deep foundation design, compressible and expansive soils, and liquefaction potential. As project manager, he works closely with the project team to analyze data, prepare reports, facilitate workshops, and train field staff for geotechnical observation and testing. Mr. Janousek also has several years' experience on construction sites, from observation of grading and compaction activities to installation of building and bridge foundations.

Mr. Janousek's project management experience includes tracking budget and schedule; directing, monitoring, and controlling technical work; preparing technical reports, bid packages, and cost estimates; providing leadership to the team throughout the project; and ensuring delivery of high-quality products. As project engineer, he works closely with the project team to analyze data, prepare reports, facilitate workshops, and train field staff for geotechnical observation and testing.
